# REKOR

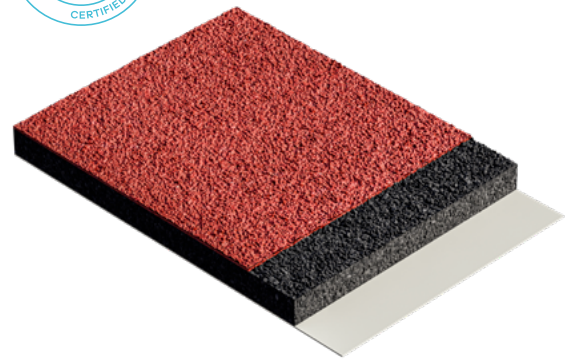

Water-permeable

## REKORTAN BS / B2S

ATHLETICS, MULTISPORT

Its structured, water-permeable top layer makes Rekortan BS/B2S the ideal solution for facilities where local conditions or other circumstances make installing a waterproof surface unfeasible.

Rekortan BS is a cost-effective all-rounder for athletics use. The structural spray-coated surface is primarily used for running tracks, run-up tracks and other athletics facilities. The B2S, which has a thicker top layer, also has a structured surface. As well as being water-permeable, it offers the benefit of quick and easy installation.

REKORTAN BS / B2S

### PROPERTIES

- BS: Structural spray-coated surface
- B2S: Structure-coated surface with thick top layer
- Rubber granules, elastomer, spray-coated
- Water-permeable
- Certifiable in accordance with World Athletics requirements

### AREAS OF USE

- Athletics stadiums
- Competitive running tracks
- School sports facilities
